Set a mood, establish a haven and express a style.

These are the possibilities you encounter when creating your home, and each one requires a singular focus and attention to detail. As you select each element—from furniture to lighting fixtures, cabinetry to crown moulding—a bigger story unfolds. It’s a well-crafted story. One that reflects great care and ingenuity. The very same qualities are reflected in Custom Wood interior doors.

Select door glass in this catalog was photographed with an amber background for visual distinction. All glass is clear decorative glass, not amber.

**E0120** Genuine Mahogany Door, Cherry Finish »
Our beautiful Custom Wood interior doors are handmade from the finest materials to enhance any home. They’re available with all the options you need to create a look that’s individualized, eye-catching and cohesive. In fact, many of these options are also available for Custom Wood and Aurora® exterior doors to help you achieve a consistent look from the inside out.
Each Custom Wood interior door from our Estate Collection will bring a sense of Old World enchantment to any space. The charming designs in this collection become even more visually interesting when you select from our vast range of options. Antique finishes and distressing give our doors a rustic appearance, while decorative clavos and straps provide a look that’s architecturally authentic.

AUTHENTIC OPTIONS

We’ve designed aesthetic options with our Estate Collection door designs particularly in mind. These options add character, giving the doors the most accurate Old World appearance possible. To review the full range of options, please see pages 48-57.

**Straps**

These decorative metal accents have a hand-forged look, which adds character to the rails, corners or radius portions of our Estate designs.

**Distressing**

For an appearance that’s charmingly rustic and worn, select our distressed texture.

**Antique finishes**

Especially ideal for our Estate designs, these finishes provide an aged look and enhance a wood species’ character marks and grain pattern.

**Clavos**

Select clavos for the look of bolt heads used in Medieval and Renaissance architecture. Each one features a handmade look.
All door styles shown in this catalog are available in any wood species and stain color we offer, with or without raised moulding, in a 1-3/8” thickness.

This collection of Custom Wood interior doors is inspired by a range of Craftsman-era architectural styles, including Craftsman, Prairie and Mission. Each design features square sticking and flat panels for architectural detailing. With our wide range of wood species and stain options, it’s easy to discover a combination that matches a home’s wood trim, cabinetry and other Craftsman furnishings.

A Custom Wood Classic Collection interior door brings elegant artistry into any room. The collection includes an ample variety of door designs to complement a home’s architectural style and interior decor. For example, a 6-panel design is ideal for a Colonial home, while a design with curved panels is suitable for a Victorian home. Louver and bifold doors are also available in this collection.

**DESIGN DETAILS**

Make our door designs your own with our vast selection of aesthetic options, which include a range of wood species, finishes and textures, various types of glass and an array of hardware. Along with these options, our custom capabilities make it possible to have nearly any door you can imagine.
**EFFORTLESS BEAUTY**

*Alder—Alnus rubra*

This versatile wood species features a fairly straight grain with areas of burl clusters and a few small knots. These marks add character to the door and will provide darker texture and color when finished. Alder varies from pale yellow to reddish brown, and it accepts stains exceptionally well. It’s also the lightest and least dense of all the standard wood species we offer.

*Also available: Knotty Alder*

*With a Clear finish, variances in woodgrain and color are more apparent. Filled nail holes are also more noticeable.*

**Custom Door tint finishes include White Wash and Pebble Grey Mist. These finishes are created with a wash process, which involves wiping paint on the door surface and immediately wiping it off, so only surface highlights remain. This process purposely does not produce the color consistency of typical penetrating stains, such as Chappo, Cherry or Merlot.**

Varnances in photography, printing and door sizes may cause the glass appearance and finish color as well as the door layout shown to vary from actual product. Please contact your local dealer for more information.
Cherry—*Prunus serotina*

The Cherry we use is carefully chosen and varies from rich red to reddish brown in color. It features a fine, straight and close grain with a smooth texture. Occasionally, thin gum pockets and small clusters of pin knots are visible. These character marks, along with random blonde streaks of sapwood, add a distinctive quality to the wood. Cherry stains easily and smoothly.

Genuine Mahogany—*Swietenia macrophylla*

Our Genuine Mahogany is the very best available; it’s the kind that’s typically used for the finest furniture and cabinetry. Its color ranges from reddish brown to a deep, rich red, and it stains well for a superior finish. The wood displays a prominent growth ring figure, with grain that is straight or interlocked. Genuine Mahogany offers less expansion, contraction and moisture absorption than most other hardwoods. Also available: African Mahogany
Oak—*Quercus rubra*

We use Northern Red Oak of only the best grade, which ensures the greatest color and grain pattern consistency. This Oak is renowned for its dramatically pronounced grain pattern. This pattern varies from a tight, vertical grain to a beautifully arched pattern. The color range includes light straw and honey with a light pink hue. It also accepts stains very well.

*Chappo, Cherry, Chestnut, Clear*, Dark Cherry, Ebony, Gunstock, Merlot, Pebble Grey Mist**, Russet, Wheat, White Wash**

* With a Clear finish, variances in woodgrain and color are more apparent. Filled nail holes are also more noticeable.

** Custom Door tint finishes include White Wash and Pebble Grey Mist. These finishes are created with a wash process, which involves wiping paint on the door surface and immediately wiping it off, so only surface highlights remain. This process purposely does not produce the color consistency of typical penetrating stains, such as Chappo, Cherry or Merlot.

Walnut—*Juglans nigra*

This wood species is traditionally used for fine furniture, gun stocks and boatbuilding; its durability makes it ideal for our exterior doors as well. The color varies from a rich, dark brown to black with purple undertones. Walnut features attractive blonde sapwood streaks within the darker tones, and it generally has a straight grain with occasional waves or curls. *Also available: Knotty Walnut.*

Chappo, Clear*
Smooth surface paint options
For a versatile, more contemporary look, select one of our paint colors. Our standard colors, shown below, are available for any door design. We can also match any paint color you select; simply provide us with a 4" x 4" paint sample.

Ivory  Swiss Coffee  Eggshell
Khaki  Forest  Cobalt

Wood species
In addition to the showcased wood species on these pages, Custom Doors are available in other species like Juniper, upon request.
All of our doors are available with unique surface textures that allow you to create a one-of-a-kind door with weather-worn, rustic appeal. Mix and match any of the below surface textures for a custom distressed look. Smooth is our standard surface texture used for all our doors.

**HAND HEWN**
This texture adds the look of weather-worn waves to the wood, and it is our least pronounced texture. To create it, we plane channels of various sizes into the smooth wood surface. The areas between the smooth surface and channels is then hand-sanded for a visually appealing transition between the different surface depths.

**WIRE BRUSHED**
Doors with this texture feature a charming, uneven appearance. It is a very rough, rustic surface texture. We achieve this look by running the wood through a wire brushing wheel (in the direction of the grain). This process tears random width and depth grooves into the wood for a randomly rough raised-grain appearance.

**CHISELED**
We use chisels and other tools to achieve an aged look by applying random dents and dings, also called character marks.

**WORMHOLES**
Along with character marks, we can simulate wormholes for an authentic old world charm.

**HAMMERING**
This textural option gives you a truly rustic timeworn appearance. In fact, it is our roughest and most rustic texture.

**BLACKENED ANTIQUING**
The blackened antiquing technique is used to highlight the surface textures as seen in the hammered sample on the right.

**ANTIQUING**
This look is achieved through a multi-step process that begins with applying a base stain for basic, overall color. Next a dark brown or black stain (depending on the base color) is applied between the mouldings, panels and character marks, which highlights these areas.

Variances in photography, printing and door sizes may cause the glass appearance and finish color as well as the door layout shown to vary from actual product. Please contact your local dealer for more information.
We created a few samples of possible surface texture combinations for your convenience. Please remember, these are only suggestions! You can create any combination of our surface textures to suit your unique design needs.

**LIGHT DISTRESSING**
Distress marks only, no wormholes or hand hewing

**HEAVY DISTRESSING**
Deep grooved, hand chiseled distressing

**MEDIUM DISTRESSING**
Hand hewing, wormholes and distress marks

**HAMMERING AND BLACKENED ANTIQUING**
Hammering and blackened antiquing

**CRAFTSMANSHIP DETAILS: PERMALANE PREFINISHING SYSTEM**
Each Custom Wood exterior door is protected by our exclusive Permalane finishing system. During this comprehensive 10-step process, our craftspeople apply quality stains, catalyzed sealers and a top coat to the door in a controlled factory environment. Fine hand-sanding occurs throughout the process, and detailed hand-rubbing occurs after the last finish coat. The resulting finish accentuates the natural beauty of the wood and the stain color; gives the door a satin feel; and provides protection from the elements.

1. Raw sanded wood
2. Penetrating wiping stain
3. Hand-applied open grain filler
4. First coat, catalyzed sealer
5. Second coat, catalyzed sealer
6. First coat, dual-component polyurethane
7. Second coat, dual-component polyurethane
8. Detail hand-rubbed to a smooth finish
9. Hand wax applied
10. Hand wax applied
Glass types

Our French doors are available with many glass types, and each one offers its own attractive texture, pattern or color. This glass will not only enhance your chosen door, but also add radiance to your entire home. Glass types used for our standard designs can also be used for custom creations.
GLASS TYPES

Clear Baroque  Grey Baroque  Black Baroque  Blue Baroque  Amethyst Baroque
Antique Clear  Antique Brown  Antique Light Green  Antique Light Blue  Antique Light Rose
Antique Pale Amber  Antique Medium Amber  Antique Light Purple  Waterglass Pale Amber  Waterglass Light Purple

Variances in photography, printing and door sizes may cause the glass appearance and finish color as well as the door layout shown to vary from actual product. Please contact your local dealer for more information.
Decorative metal accents

With decorative metal accents, our Estate Collection interior doors exude character in every detail. These accents include radius, corner and rail straps, as well as diamond and round clavos. Each type of accent is available in either Rust Patina or Dark Patina.

Radius Strap, Dark Patina
Corner Strap, Dark Patina
Rail Strap, Dark Patina

1" Diamond Clavos, Dark Patina
1-3/4" Diamond Clavos, Dark Patina
1" Round Clavos, Rust Patina
1-3/4" Round Clavos, Dark Patina

ELEMENTS OF STYLE: CLAVOS

Our dedication to craftsmanship is especially evident in our decorative clavos. These details are designed to add visual authenticity to doors for Old World homes. In fact, they were inspired by the functional bolt heads that were used in Medieval and Renaissance architecture. The shapes, finishes and hand-forged appearance of our clavos testify to the thoughtful artistry of another age.
**Hinge options**

Our standard and optional hinge selection is shown below. All standard hinge finish options are available at no charge for our prehung doors. To specify hinges that are not shown here, please call for a quote and availability.

* Oil-Rubbed Bronze will change in appearance over time.

**Decorative tips**

For added character, select our decorative hinge tips. They’re available in three shapes, and each shape comes in any of our hinge finish colors.
MARKS OF DISTINCTION

Stiles and rails
Stile and rail features include an engineered lumber core, which is stronger and more durable than solid wood and resistant to shrinkage. JELD-WEN reserves the right to build in solid construction or use finger joint stiles, rails and veneers.

Shown in 1-3/8”:

- Ovolo Sticking
- Square Sticking

- #141 Raised Moulding
- #1200 Raised Moulding

Panel, sticking and moulding options
Even a seemingly minute detail can make a significant difference in the look of a door, which is why we offer a range of panel, sticking and moulding options. The panel profile is the dimensional detail design of a panel. We offer four panel profiles: double hip, flat, estate raised and estate planked. Sticking profiles, which are the detail around the perimeter of the panel, are available in either ovolo or square sticking. Two raised moulding options are also available.

Panel designs

- 3/4” Raised Panel, Double-Hip Profile
- 1-1/4” Raised Panel, Double-Hip Profile
- Veneered Flat Panel
- Estate Raised Panel
- Estate Planked Panel

Stiles and Rails: French and plantation louver door sticking options
True divided lite French doors and full lite doors are available with ovolo sticking, 1/4” safety glass, and several different types of decorative glass designs. All French doors from JELD-WEN are crafted as true divided lites. Each lite of glass is clamp glazed in place, eliminating nail holes and putty marks.
Casings

Our casing selection includes various profiles and sizes to complement nearly every architectural style. If you want something different, custom casings are also available (please contact your local dealer for more information).

Variances in photography, printing and door sizes may cause the glass appearance and finish color as well as the door layout shown to vary from actual product. Please contact your local dealer for more information.
PERSONAL PASSAGES
Our interior doors can be customized in many ways, which we’ve highlighted here. For more information, please consult your local dealer.

Shapes
Creating a customized door often begins by questioning conventions. For example, why must an interior door be completely rectangular? With us, you have a few other options. Custom door shapes include square top, segment top and radius top.

Sizes
We provide a range of custom door sizes. You can select widths up to 42”, heights up to 96”, and thicknesses of 1-3/8”, 1-3/4”, or 2-1/4”.

Carving
An ideal way to showcase wood’s beauty is with carving. Whether you want a traditional floral motif or a contemporary company logo, we have the capabilities to hand-carve custom designs. The only limit is your imagination.
**STYLISH VARIETY**

**Passage doors**
These doors are available as full and square machined door slabs, or are beveled and hinged prehung units.

**Double doors**
This door type includes two doors that can be specified as “doors only” or as a prehung unit within a single jamb. When double doors are specified, the jamb is sent loose, with hinges applied for job site assembly. If specified, the astragal is attached to the inactive door and ball catches are installed.

**Standard pre-fit clearances for passage units:**
- Doors are full height, 3/16” under nominal in width (3/32” off each side)
- Double door units have a 3/32” gap between doors

**Pocket and double pocket doors**
Pocket door jambs are sent loose. The header and one leg are split to accommodate the hardware’s functioning. Hardware is not included. Install appropriate hardware for 1-3/8”-thick pocket doors. If jambs are not needed, a passage door only (i.e., a slab) can be ordered without a handing designation. Pocket doors are not available with raised moulding.

**Standard pre-fit clearances for pocket units:**
- Doors are full height, 3/16” under nominal in width (3/32” off each side)
- Double door units have a 3/32” gap between doors

**Bifold doors**
A bifold door can be ordered with or without a jamb. Track hardware is included. Bifold doors are undersized in height to accommodate the track hardware. Slabs are hinged by JELD-WEN. Jambs (if specified) are sent loose. Wood fascia trim is included to conceal the track hardware after installation.

**Standard pre-fit clearances for bifold units***:
- 1” under nominal in height* (for hardware track clearance)
- 1/2” under nominal in overall width (2-door bifolds)
- 1” under nominal in overall width (4-door bifolds) to accommodate heavy-duty track hardware

*The callout size of a bifold door is the finished opening size (e.g., 4’0” x 6’8” means that a bifold uses a 4’0” x 6’8” finished opening size).
**Bypass doors**

Bypass doors can be ordered with or without jambs. Bypass track hardware is included (heavy-duty hardware is supplied with 1-3/4"-thick doors). These doors are undersized in height to accommodate the track hardware. When jambs are ordered, the header jamb is sized 1" under nominal width so that the bypass doors will overlap by 1". Jambs (if specified) are sent loose. Wood fascia trim is included to conceal the track hardware after installation. Bypass doors are not available with raised moulding.

**Standard pre-fit clearances for bypass units:**
- 1" under nominal in height (for hardware track clearance)
- 3/16" under nominal in width

** 1-3/4"-thick bypass doors are sized 2" under nominal in height to accommodate heavy-duty track hardware.

---

Variances in photography, printing and door sizes may cause the glass appearance and finish color as well as the door layout shown to vary from actual product. Please contact your local dealer for more information.
STYLISH VARIETY

Custom Wood interior doors are available as slabs (doors only) or as prehung units (hinged within a select jamb). Doors ordered as slabs must be specified as either pre-fit, which are sized to fit within a jamb opening, or full and square, which are doors that are sent from the factory sized at full nominal width to be undersized, beveled and machined by the purchaser for hinging and hanging within a jamb. Full and square bifold slabs are not available.

Insignia® prehung door systems

All Custom Wood interior doors are available prehung with our Insignia Door System. This complete package ensures smooth, easy installation with a precise fit. It includes all the necessary components, and each part is carefully fashioned for a correct fit.
Jamb selection
Flat side jambs are 4-9/16" or 6-9/16". Rabbeted jambs are available and are used in some applications rather than flat jambs with applied stops.

Jamb legs are joined to the header with a dado joint.Applied stop moulding is mitered at the header joint. Colonial stop moulding is standard and is used for all applications unless otherwise specified. A Prairie stop is optional.

Each prehung door is shipped standard with a temporary stop. The jamb is completely finished without stop moulding. Dummy stop material is applied to secure the door during shipment; it is removed at the job site. Loose stop moulding is applied to cover all installation nails and can be aligned on-site to allow for variances in reveals and installation tolerances.

In typical installations, the casing should be installed with a 1/8" to 1/4" setback from the jamb.

Hinges
All 6’8"- and 7’0”- high doors are prehung with three hinges; 8’0” doors are hung with four hinges.
- 1-3/8”-thick doors are hung with 3-1/2” x 3-1/2” hinges with 1/4” radius corners
- 1-3/4”-thick doors are hung with 4” x 4” hinges with 1/4” radius corners

Bore
Prehung doors are bored with standard 2-1/8” face bore and a 1” edge bore. The edge is mortised (1/4” radius corners) for a 1” x 2-1/4” latch faceplate. The face bore is located approximately 44” from the top of an 80” door, 48” from the top of an 84” door and 60” from the top of a 96” door. Custom boring is available on a quote and availability basis.

Standard backset is 2-3/8”. A 2-3/4” backset is also available.
JELD-WEN® Products are designed to create lasting value for your home. This warranty is effective for JELD-WEN products manufactured on or after July 1, 2010 for use in the United States and Canada. Separate warranties apply for our garage door collections. Any previous warranties will continue to apply to products manufactured by JELD-WEN prior to this date. For additional information, including care and maintenance information refer to www.jeld-wen.com or www.jeld-wen.ca.

What This Warranty COVERS
We warrant to the original owner that if your JELD-WEN Product exhibits a defect in material or workmanship within the time periods from the date of purchase as specified below, we will, at our option, repair, replace or refund the purchase price of the Product or component part.

Owner-Occupied Single-Family Residence Limited Warranty
- **Fiberglass Door Slabs:** We warrant our fiberglass door slabs for as long as you own and occupy your residence.
- **Steel Door Slabs:** We warrant our steel door slabs for ten (10) years from the date of initial purchase.
- **Wood Door Slabs:** We warrant our wood door slabs for five (5) years from the date of initial purchase.
- **Interior Door Slabs:** We warrant our interior door slabs for five (5) years from the date of initial purchase.
- **Factory Prefinish:** We warrant the factory-applied prefinish on our doors against peeling, checking, or cracking for periods listed below. Should the factory prefinish be proven defective, we will at our option, replace or refinish the door or pay up to credit per opening to the current owner. (Note: this coverage applies to factory-applied finish coat options only; standard factory-applied primer is not a finish coat.)
- **Door Frames:** We warrant our door frames for one (1) year from the date of purchase.

Auralast® Protection for Door Slabs and Frames: Our AuraLast pine wood door slabs will be free from wood cellular structure failure (often referred to as “wood cellular breakdown”) caused by decay and/or termites for twenty (20) years from the date of initial purchase. Our AuraLast pine door frame components will be free from wood cellular structure failure caused by decay and/or termites for as long as the original consumer owns the home in which the AuraLast wood frames are originally installed. Warranty coverage outside Canada, the contiguous 48 states and Alaska is contingent upon approval from the JELD-WEN Customer Care Department. Please contact us.

Commercial Limited Warranty (Other than Owner-Occupied Single-Family Residence)
- **Fiberglass, Steel, Wood and Interior Door Slabs:** We warrant our door slabs for five (5) years from the date of initial purchase.
- **All Other Products, Components, Prefinishes, and Options as Listed Above:** Coverage is the same as for Owner-Occupied Single-Family Residences as listed above.

Transferability
This warranty is not transferable.

How to Get Assistance
If you have a problem with your JELD-WEN Door, immediately upon discovery, contact the distributor or dealer from whom you purchased our product or contact us directly:

<table>

<td>$100 per opening</td>
</tr>
</tbody>
</table>

We can respond quickly and efficiently if you provide the following: a) date and location of purchase, or product identification from the tag on the top edge of the slab, b) how to contact you, c) the address where the product can be inspected, and d) a description of the apparent problem and the product (photographs are helpful).

What We Will Do
Upon receiving your notification, we will send out an acknowledgement within three business days to the contact, which you have provided. We will investigate your claim and will begin to take appropriate action within 30 days after receipt of notification. If it is determined that the product does not have a defect covered by the warranty, we may charge an inspection fee for an on site inspection that is required or requested by you. If we determine that there is in fact a defect we will repair the product, ship a replacement product to the distributor or person making the claim in the same specification as the original product sold to the distributor, or refund the original purchase price paid to us. Replacement components/products are warranted for the balance of the original product warranty or 90 days, whichever is longer. This warranty gives you specific legal rights, and you may have other rights that vary from state/province to state/province.

Continued on next page
If the claimed nonconformity is warp of a door slab, we may defer repairing or replacing the door slab for a period up to twelve (12) months from the date of claim. It is not uncommon for a temporary warp condition to occur as the door slab adjusts to local humidity and temperature conditions. This deferral will not be counted against the warranty period.

What This Warranty Does NOT Cover
JELD-WEN manufactures and sells both individual door slabs and complete door systems. This warranty does not cover parts or components (e.g., locksets, handles, etc.) not sold by JELD-WEN to the original owner. See your distributor or dealer regarding the warranty on the entire door system and/or these other components.

We are not liable for:
- Normal wear and tear, including normal wear and tear of weatherstrip; and natural weathering of surfaces or variations in the color or texture of wood or finish; surface cracks that are less than 1/32” in width and/or 2” in length; for knotty alder and juniper: surface checks that are less than 1/8” in width and/or 5” in length, and knot placement, quantity, or size.
- Problems due to misuse or abuse; failure to follow the care and maintenance instructions; or as a result of any cause beyond our reasonable control (e.g., fire, flood, earthquake, other acts of nature, and acts of third parties outside of our control).
- Problems related to: improper field finishing of all surfaces (front and back) and edges (top, bottom, and sides) of the door slab and frame (See our Finishing Instructions at www.jeld-wen.com/resources); variation or unsatisfactory results in sheen or texture resulting from the field application of paint or any other finishing material.
- Failure to provide an adequate overhang for exterior doors; damage caused by extreme temperature buildup where storm doors are present. For general guidelines, see our “Appropriate Protection for Exterior Doors” in our product literature or at www.jeld-wen.com/resources; for specific information pertaining to your structure, consult your contractor or other building professional.
- Warp for any 3 6" wide by 8’ 0” high by 1 3/4", or smaller door slab, which does not exceed 1/4” in the plane of the door slab itself; door slabs wider and/or higher are not guaranteed for warp.
- Bow or misalignment in the frame or jamb in which the door slab is hung (if such is purchased from JELD-WEN unmachined and not prehung).
- Slight expansion or contraction due to varying environmental conditions; slab movement (shrinkage or swelling) of 1/4” or less due to temperature and humidity, consult our Care & Maintenance documents on how to work with this natural movement.
- Wood cellular structure failure for wood components other than of AuraLast pine and any components (including pine) that come in direct contact with soil. Note: superficial mold/mildew does not indicate wood cellular structure failure.
- Problems related to water and/or air infiltration due to improper assembly; installation errors or flaws in building design and construction; installation must be in strict conformance with the installation instructions provided by the manufacturer of the door entry system.
- Structural integrity issues or other problems caused by improper field fitting of the hardware, improper sizing of the door slab, or other assembly problems.
- Damage or poor product performance resulting from installation into a condition that exceeds product design standards and/or certified performance specifications and/or does not comply with applicable building codes.
- Hardware or inserts that are not provided by us, such as locksets, door handles, strikes, etc.
- Discoloration or rusting of decorative metal accent options, such as grilles, clavos, straps, etc.; discoloration of wood sills provided by us.
- Cost for labor, removal or disposal of defective product(s), installation or finishing of the replacement door or component.
- Incidental or consequential damage. Some states/provinces do not allow the exclusion or limitation of incidental or consequential damages, so this may not apply to you.

Important Legal Information
This Limited Warranty document sets forth our maximum liability for our products. We shall not be liable for special, indirect, consequential, or incidental damages. Your sole and exclusive remedy with respect to any and all losses or damages resulting from any cause whatsoever shall be as specified above. We make no other warranty or guarantee, either express or implied, including implied warranties of merchantability and fitness for a particular purpose to the original purchaser or to any subsequent user of the product, except as expressly contained herein. In the event state or provincial law precludes exclusion or limitation of implied warranties, the duration of such warranties shall be no longer than, and the time and manner of presenting any claim thereon shall be the same as, that provided in the express warranty stated herein. This Limited Warranty document gives you specific legal rights, and you may have other rights that vary from state/province to state/province.

No distributor, dealer or representative of JELD-WEN has the authority to change, modify or expand this warranty.

1”JELD-WEN Products” shall refer to interior and exterior door slabs and systems manufactured in the United States and marketed under the JELD-WEN brand name for use in the United States and Canada. See our separate Export Warranty for applicable coverage on products used outside the United States and Canada.

2 This warranty extends to the original owner (original owner means the contractor/dealer/distributor/purchaser and the initial owner of the structure where the product is initially installed) and is not transferable. The original purchaser of this product acknowledges that they have read this warranty, understand it and are bound by its terms and agrees to provide this warranty to the original owner of the structure into which the product is installed. Should state or provincial law preclude no transferability, then the warranty period is effective as applicable up to five (5) years from the date of initial purchase for door slabs and systems and one (1) year from the date of manufacture for the factory pre-finish.
